WINTER PAVEMENT WORK & 2022 PAVEMENT AWARDS

WINTER POT HOLE & ALLEGATION REPAIRS

Typically speaking, asphalt & winter do not go hand in hand. But Swan Co. is not your typical pavement contractor. When asphalt repairs cannot wait for warmer weather, Swan Co. utilizes 'CrackMaster Mastic.'

CrackMaster Mastic is a hot-applied, polymer-modified mastic asphalt binder; factory-blended with graded fillers, steel fibers, granite aggregates, and recycled tire rubber. It is designed to *replace traditional hot pour crack sealants* which lack structural strength *and other more rigid patches like cold patch or hot mix* that are prone to failure due to their stiffness or poor quality.

To learn if your asphalt repairs can be done with CrackMaster Mastic this winter, call or email us today!
